How to Present your Paper/Research

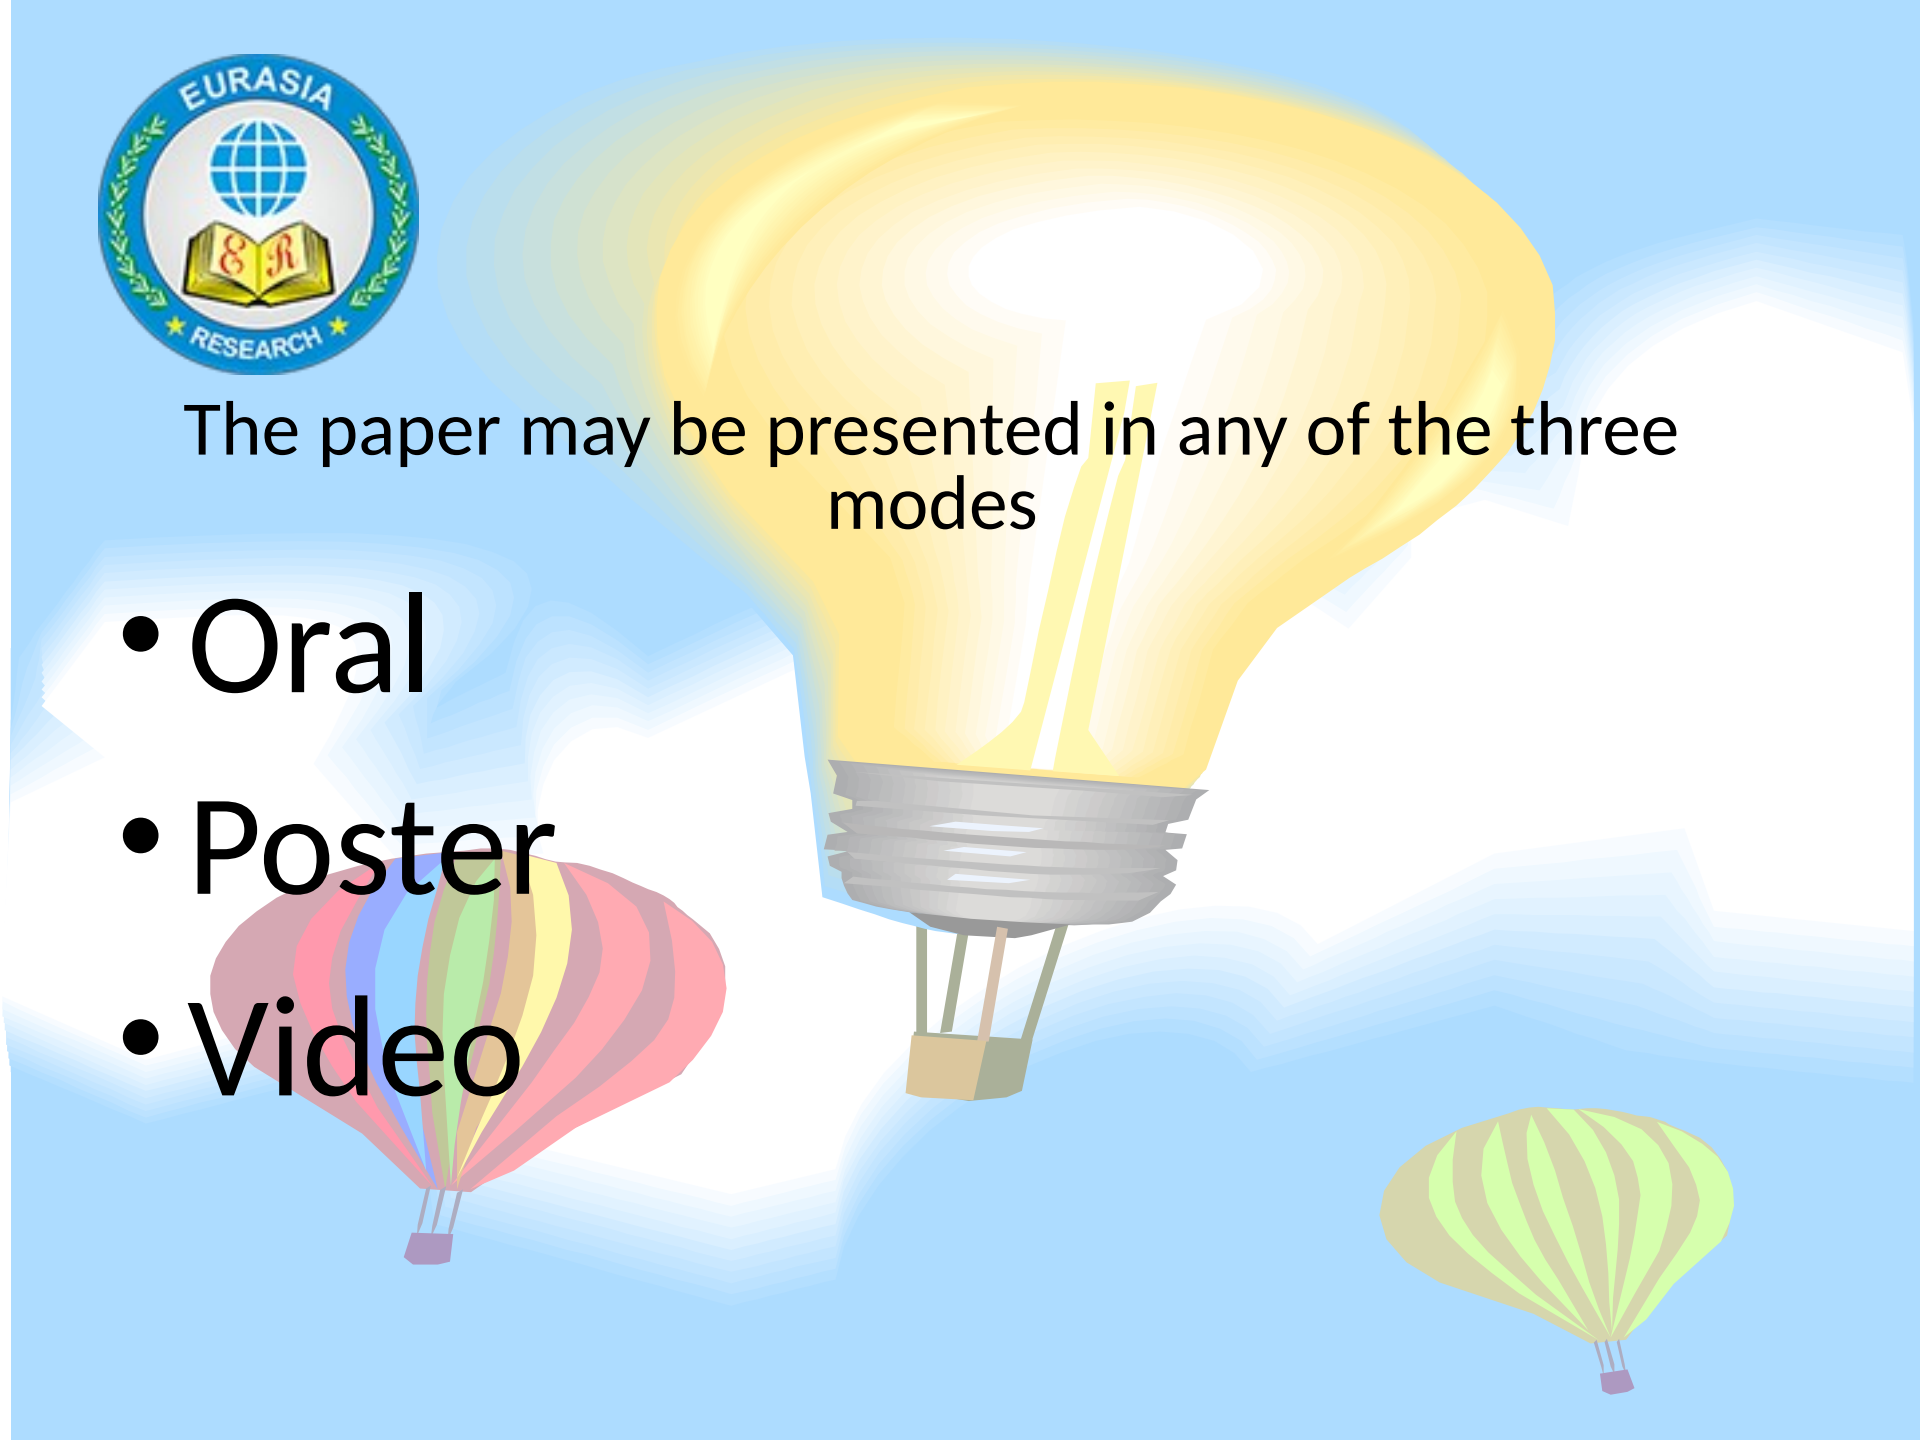

Eurasia Research Conference Secretariat

The paper may be presented in any of the three modes

- Oral
- Poster
- Video

Oral Presentation

We encourage our participants to adopt a crisp 10 Minutes Presentation Format.

1 Minute: Self Introduction and Topic

2 Minutes: Problem Area/ Need of Research

2 Minutes: Inputs/ Efforts/ Methodology

2 Minutes: Outputs

1 Minute: Take Always

2 Minutes: Discussion

This format is tried and tested, and makes the sessions very meaningful, rather than monotonous and full of slumber. Knowledgeable participants, but with poor soft-skills also find it easy to present. This format provides more time for networking and discussions and idea sharing, which are the core purpose of our conferences.

Poster Presentation

- All you have to do is to make a poster on soft copy/hard copy.
- We would project the soft copy on the LCD projector for 5-10 minutes. If the author brings the poster, we would be attaching it to the board for its display.
- If anybody has some queries they may ask you to clarify.

Sample Poster

Video Presentations

- You may just make a video of presentation
- The presenter may be:

a) The author/co-author

b) Your colleague/friend

Please make sure that it is audible/ interesting /understandable.

- This would be run on the projector with audio speakers

- *You may record on your HD Phone/ Camera in a closed room with proper lighting, any friend/ colleague/ expert to present your research in our unique 10 minute presentation format*

Thank you!
